

“Prevent Littering” and Go Green With Pet Supplies “Plus” and the Nooters Club!

Animal lovers in Oakland County now have a new way to “Prevent Littering” and Go Green -

Pet Supplies “Plus” and Nooters Club Apparel and Gifts have teamed up to offer a new canvas shopping tote bag to remind people to stop pet overpopulation and to replace plastic grocery bags with reusable, environmentally-friendly tote bags. The tote bags, made of sturdy, natural-colored cotton canvas, have the Nooters Club logo and the phrase “Prevent Littering” surrounded by cartoon puppies or kittens and are designed to create awareness of pet overpopulation and preventing unwanted litters. They also make excellent shopping totes, making the effort to reduce the number of plastic shopping bags that fill U.S. landfills every year easier – and a lot more stylish. The bags are available in either a dog or cat design for \$10 each with \$1 of every purchase going towards the Oakland Pet Fund Spay/Neuter Fund. Additionally, when a customer purchases a “Prevent Littering” tote bag, Pet Supplies “Plus” is offering 20 percent off the total purchase. Each year, thousands of pets in Oakland County and 65 percent of all animals that end up in shelters nationwide are destroyed due to pet overpopulation. Nooters Club designs and produces t-shirts and gifts that take a whimsical approach with the very important task of alerting responsible pet owners to the benefits of having their pets spayed and neutered to “Prevent Littering,” thereby ending the needless suffering of so many unwanted animals. Spaying and neutering pets have other benefits, as well – fixed pets are healthier, live longer, are more sociable and have fewer behavioral and temperamental problems than those who haven’t been fixed.

“Responsible pet ownership is the first step in preventing pet overpopulation and Pet Supplies „Plus“ is excited to join with the Nooters Club in making people aware of the benefits of spaying and neutering their pets,” said Addy Murphy, owner of Pet Supplies “Plus” in White Lake Township. “Our „Prevent Littering“ tote bag promotion is a great way to not only help stress the importance of reducing pet overpopulation but also in reducing the number of disposable plastic bags littering our environment.”
